

Sushi Restaurants in Boston Neighborhoods

Introduction/Business Problem

The city of Boston is truly a multicultural and diverse city in the United States. It has a lot to offer: rich history, culture, sports, higher education, healthcare, and of course the fresh sea foods. Millions of visitors from all over the world visit Boston every year and many of them crave for Boston's famous seafood. Locally harvested lobsters, oysters, cod, tuna, and many other species provide a plethora of options to choose from.

In this project I want to provide a simple recommendation system to the visitors to choose a Boston neighborhood with the highest concentration of Sushi restaurants so that they will have many options to choose from. It will provide visual locations of the restaurants in the map which can be zoomed in or out to help planning a better visit.
